Do not use a heading for the first section.

Type all footnotes on a separate page following the article.1 Place each table and figure on a separate page at the end of the paper (see figure 1 and table 1).

Manuscript Formatting

The manuscript formatting instructions are available at http://ajae.aem.cornell.edu/formatting.htm. A detailed reference guide is available at http://ajae.aem.cornell.edu/documents/ReferenceGuideMarch2006.pdf. All references used as examples in the reference guide are shown in this document to demonstrate that the
AJAE BibTEX style complies with these guidelines. Please report any problems at http://sourceforge.net/projects/economtex/.

Citations in Text

Citations in Parenthesis

A equals B (Black 1929), B equals C (Wold and Jureen 1989), C equals D (Wold, Smith, and Jureen 3003), D equals E (Wold et al. 3004), E equals F (Wold et al. 3005), F equals G (Brown 1965), and G equals A (U.S. Department of Agriculture 1965). Hence, A, B, C, D, E, F, and G are all equal (Black 1929; Wold and Jureen 1989; Wold, Smith, and Jureen 3003; Wold et al. 3004, 3005; Brown 1965; U.S. Department of Agriculture 1965).

Equations

All displayed equations should be left-justified and numbered consecutively (on the left). Vectors and matrices should be in bold.

(1) \( y = a + \mathbf{X} \mathbf{b} \)

where \( a \) is a scalar, \( y \) and \( \mathbf{b} \) are vectors, and \( \mathbf{X} \) is a matrix. Of course, the same holds for Greek symbols.

(2) \( \mathbf{\theta} = \alpha + \mathbf{\Psi} \mathbf{\beta} \)

where \( \alpha \) is a scalar, \( \mathbf{\theta} \) and \( \mathbf{\beta} \) are vectors, and \( \mathbf{\Psi} \) is a matrix.
Notes

1 This is a footnote that looks like an endnote. This is a footnote that looks like an endnote. This is a footnote that looks like an endnote. This is a footnote that looks like an endnote. This is a footnote that looks like an endnote.
