1 Introduction

We defined three audiences:
\SetNewAudience{admins}
\SetNewAudience{devs}
\SetNewAudience{execs}

2 The \CurrentAudience command

The current audience is \CurrentAudience.

The current audience is execs, devs.

3 The \showto command

Note the nesting here:
\showto{admins}{This text is visible to admins only}\footnote{And admins see a footnote.}
\showto{admins, devs}{This text is visible to admins and devs. \showto{devs}{This text is visible to devs.}}
\showto{-, admins}{This text is \textit{not} visible to admins.}
This text is visible to everybody\footnote{And everybody sees a footnote}.

This text is visible to admins and devs. This text is visible to devs. This text is \textit{not} visible to admins. This text is visible to everybody\footnote{And everybody sees a footnote}.

4 The \shownto environment

\begin{shownto}{admins}
This is for admins only.
\end{shownto}

\begin{shownto}{-, admins}
This is for everybody \textit{but} admins.
\end{shownto}

This is for everybody \textit{but} admins.

\footnote{And everybody sees a footnote}
5 Use of verbatim text

We cannot use `verbatim` inside `shownto`, but we can use `input` with `verbatim` inside.

We also can use `path` and `url` from hyperref package:
\path{a$2}, \url{http://borisv.lk.net/cv/cv.html\#Publications}.

Another option is the use of \SaveVerb and friends from `fancyvrb` package:
\begin{SaveVerbatim}{SavedVerb}
This is a verbatim line: "!@#$%^&*{}:"'<>?
\end{SaveVerbatim}

6 Syntactic sugar

We have a special footnote command `Footnote{admins}{This footnote is for admins only.}.`.

We have a special footnote command.

\begin{Subsection}{admins}{Admins-only subsection}{This subsection is visible only to admins}
We have special sectioning commands.
\end{Subsection}

\begin{Subsection}{-,admins}{Not for admins}{This subsection is not visible to admins}
Another example. \showto{devs}{This is visible to devs only.}
\end{Subsection}

6.1 This subsection is not visible to admins

Another example. This is visible to devs only.
